DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-38 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

As per claims 1-38, the "act" of the claimed process manipulate only numbers, the acts are not being applied to appropriate subject matter (a physical input and output). Thus, a process consisting solely of mathematical operation, i.e., combination of factors computing an ϵ - closure for each state of an automation and modifying $E(p)$ does not manipulate appropriate subject matter and thus cannot constitute statutory process. For example a physical input are audio signals.

3. An invention may be patentable only if it falls in of the four statutory class of subject matter 35 U.S.C. 101 *Kewanee Oil Corp.*, 416 U.S. 470,483,181 USPQ 673,679 (1974). The CCPA stated that "any process, machine, manufacture, or composition of matter constitutes statutory subject matter unless it falls within a judicially determined exception of section 101." *In re Pardo*, 684 F. 2d 912,214 USPQ 673,677 (CCPA 1982). The claims are directed to non-statutory subject matter because the claimed subject matter falls within the mere idea or abstract intellectual concept exception to U.S.C. 101.

4. Descriptive material that cannot exhibit any function interrelationship with the way in which computing process are performed does not constitute a statutory process. Non-functional descriptive material stored on a medium is merely carried on the medium, it is not structurally or functionally interrelated to the medium. The allowance of such a claim would exalt form over substance. See Guidelines IV.B.1(a)-(b).

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-38 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: input and output.
